

STELLARWAVE × WEALTH MANAGEMENT

AI Operations for Wealth Managers

"Custom automation systems that give your senior advisors
10 to 15 hours back – every week."

A premium engagement framework – 2026 edition

30%

of your top advisors' week
is spent on tasks AI can do
in minutes.

Onboarding documents, RFP responses, compliance reviews, quarterly reporting – the tasks no one bills for that quietly consume your highest-paid people.

Client onboarding

8 hours

per new client

KYC, account setup, IPS drafting, custodian paperwork.

RFP responses

5,800 hours

per year (10-person team)

Institutional & gov RFPs consume up to 23% of team capacity.

Compliance reviews

30–40%

of admin cost wasted

Doc parsing, audit trails, filings – rules-based, manual.

At \$300 / advisor-hour fully loaded, a 5-advisor firm loses \$200k+ of senior capacity every year. No one notices.

Why most AI initiatives in wealth management stall.

ChatGPT Enterprise / Copilot	AI for everyone in the firm	Generic outputs. No knowledge of your IPS templates, custodian, compliance rules. Advisors stop using it after week 2.
Make / Zapier / n8n	Automate without code	Recipe-based. Breaks at the first API change. Cannot reason. Cannot read a 60-page document and flag the three risk clauses.
In-house AI engineer	Build it ourselves	\$250k+ fully loaded. 12-month ramp. Likely to leave inside 18 months – taking the architecture with them.
Big-4 / strategy consulting	Enterprise-grade AI roadmap	\$500k-\$2M engagements. 18-month timelines. PowerPoint deliverables. Code you don't own.

There is a fifth path.

Custom AI operations. Delivered in weeks. Owned by you.

01 · CUSTOM-BUILT

Claude agents + MCP servers + skill files,
designed around YOUR firm's workflows.
Not a SaaS template. Not a generic chatbot.
Your operations, codified.

02 · DATA SOVEREIGNTY

MCP servers run on-premise.
Anthropic API: zero training-data retention.
GDPR-aligned. SOC 2 in progress.
Your client data never leaves your perimeter.

03 · SENIOR-LED DELIVERY

One architect from discovery to deployment.
No junior hand-offs. No account managers.
You speak with the person
building it.

04 · EMBEDDED OPERATIONS

A monthly retainer keeps it alive:
new automations, monitoring, edge fixes.
The system grows with the firm.
It does not rot in production.

Five proven automations for wealth management firms.

01

Client onboarding

Pulls KYC docs, drafts the IPS from intake notes, generates custodian paperwork.

8 h → 2 h

per new client (-75%)

02

RFP response system

Reads RFP, retrieves matching content from your knowledge base, drafts the response.

-60% / +16%

response time / win rate

03

Compliance review

Parses regulatory updates, flags impact on filings, drafts amendment language.

-30 to -40%

admin cost reduction

04

Quarterly reviews

Pulls portfolio data, drafts personalized review per client. Advisor edits in 30 min.

4 h → 30 min

per client (-87%)

05

Lead intelligence

Researches inbound prospect, produces 1-page brief, suggests best-fit advisor.

< 5 min

pre-call brief ready

Capacity returned to your firm — measured, not promised.

Advisors freed

5

Hours/week saved

× 10

Loaded \$/hour

× \$300

Weeks/year

× 50

Capacity returned per year

\$750,000

Scenarios

Firm size	Hours saved / week	Capacity returned / year	Workflow Studio payback
3 advisors	30 h	\$450k	1.7 months
5 advisors	50 h	\$750k	1 month
12 advisors	120 h	\$1.8M	< 3 weeks

We measure ROI in our engagements. We do not project it from slides.

80-operator services firm — before / after.

Adapted from a recent StellarWave engagement in operations-heavy services. We do not yet claim a wealth management client; this case will be replaced by a named RIA reference upon our first signed deal in the segment. Numbers below are real.

BEFORE

3 hours

of manual coordination per operator per day

Recurring entry errors

flagged by the controller

Hard-cap at 80 operators

without a full-time admin

AFTER (12 weeks)

30 minutes

of supervised review per operator per day

Zero entry errors in 90 days

audit trail auto-generated

Capacity to 160

without hire – margin per operator +18%

"We were not looking for AI.
We were looking for our weekends back."

– COO, anonymized

Project investment

\$32,000

Retainer

\$3,500 / month

Payback

Month 5

Status

Engagement ongoing 18+ months

Three ways to start.

DIAGNOSIS CALL

Free

30 min · video · no pitch

- Mapping of 5-8 automation candidates
- Ranked by ROI / effort / risk
- Written summary within 48 h
- No commitment to proceed

[Book the call →](#)

WORKFLOW STUDIO

\$25 – 40 k

6-10 weeks · fixed-price

- Discovery + custom design
- 5 production-ready automations
- Documentation + team training
- 30 days post-launch support

[Request a scope →](#)

AI OPERATIONS

\$3 – 5 k / mo

6-month minimum · ongoing

- One new automation per month
- Monitoring + edge-case fixes
- Quarterly ROI review
- Direct Slack with the architect

[Discuss the retainer →](#)

Most engagements: Workflow Studio first, then the AI Operations retainer. First-year envelope: \$60-90k per client.

Predictable delivery. Defensible architecture.

DELIVERY TIMELINE

Week 1	DISCOVERY Workflows mapped. Stakeholders interviewed. Automation candidates ranked.
Week 2-3	DESIGN Skill files architected. MCP servers scoped. Approval before build.
Week 4-7	BUILD Iterative development. Weekly demos. Test data + dry runs.
Week 8-10	DEPLOY + TRAIN Production deployment. Team training. 30-day support window opens.

SOC 2 Type II – in progress. Target Q4 2026.

SECURITY STACK

LLM PROVIDER Anthropic Claude API Zero training-data retention by contract EU & US data residency available
ORCHESTRATION MCP servers – self-hostable Skill files versioned in your repo No third-party SaaS in the data path
DATA HANDLING Encryption at rest (AES-256) Encryption in transit (TLS 1.3) GDPR / EU AI Act aligned
ACCESS CONTROL Role-based, audited Per-automation kill switch Daily monitoring + monthly review

NEXT STEP

One question. Thirty minutes. Your roadmap.

Book a Diagnosis Call. We map five to eight automation candidates for your firm,
ranked by ROI. We send the written summary within 48 h.
You decide what to do next.
